Hacked Website

Business Interruption

Cyber Insurance

IT TAKES YEARS TO BUILD A REPUTATION AND A FEW MINUTES OF A CYBER-INCIDENT TO RUIN IT

Increased reliance on digital systems and access to information online significantly increases our vulnerability to cybersecurity threats.

We understand how to minimize gaps and tailor coverage for loss, compromise, or electronic data theft. Our policies go beyond the cover typically provided in a Business Insurance package.

Limits can be adjusted to suit SMEs through to large corporates.

The main areas of cover include:

FIRST-PARTY COVERAGE

Expenses relating to recovery from damage to computer programs and electronic data.

THIRD-PARTY PRIVACY AND NETWORK SECURITY LIABILITY

Breaches of personal or corporate information and data protection laws.

BUSINESS INTERRUPTION

Expenses and lost revenue due to a ransomware attack, or any other computer virus or malware attack impairing a computer system.

FUNDS TRANSFER FRAUD AND TELEPHONE HACKING

Directed toward businesses to fool employees into sending money, diverting a payment or transferring funds to the fraudster.

PHISHING

A type of social engineering attack often used to steal user data, including login credentials and credit card numbers. It occurs when an attacker, masquerading as a trusted entity, dupes a victim into opening an email, instant message, or text message.
