## Our Why!

We often see individuals and businesses develop a habit of simply rolling over insurance contracts without review. Business and personal circumstances are not static; they constantly evolve. How you prepare and adapt to change will dictate your success, and we believe Insurance should do the same.

The fundamental goal at Azure Risk is to serve as a Go-To Advisor, not a Salesperson.

With us, you get insurance geeks who want to engage with you to understand better your priorities and what you want to achieve.

# What You Can Expect From Us

- Insurance across all marine, transport and logistics segments.
- Products that provide solutions; no gimmicks.
- Relevant and affordable protection.
- 'Edge', our digital Cargo Insurance platform, it's easy to use and one of the select few authorized for use by Lloyd's.

## AZURE RISK

The core of our business is to improve your experience by being part of your insurance decision-making process and give you the choice of appropriate and affordable cover. We don't stop once the product is in place; we continue as advocates throughout our relationship.

## MARINE CARGO INSURANCE

The protection of Marine Cargo Insurance allows for the smooth day-to-day running of your business by providing the financial security of being covered against potential losses which may occur during air, sea or land transportation.

## FREIGHT FORWARDERS LIABILITY INSURANCE

If your company coordinates or handles the transport of goods for a third party, you are potentially liable for damage or loss of goods whilst under your care. We cover all forms of transport regardless of whether it is by land, sea, or air.

We are committed to being the partner our clients go to with anything challenging.

## ANMOL SAWLANI DIRECTOR

At Azure Risk, when we write a policy, we write it for you. We believe Insurance is more than just underwriting, and we ensure that our clients understand the purpose of insurance.

We combine a passion for service with decades of experience and exceptional financial resources to deliver the best possible insurance products for people and businesses.
